

ENVIRONMENTAL AND SUSTAINABILITY IMPACT REPORT

 At Balliu Export, we are committed to informing our clients and stakeholders about our environmental impact.

RECYCLE

REDUCE

REUSE

RENOVE

Our central facilities are powered by **up to 30% of totally clean energy**, thanks to the installation of solar panels.

With this measure, we are significantly reducing our carbon footprint.

INSTALLATION OF SOLAR PANELS

30%

Our **Plan Renove** initiative has had a positive impact on waste management. During the reporting period, we have **collected a total of 1360 units of products** which have been properly treated for recycling.

This programme not only allows us to reduce the amount of waste generated by our products, but also fosters the **circular economy** by promoting the reuse and recycling of materials.

PLAN RENOVE

2024 saw the **release of the 100% recycled version** of the catwalk. The raw material comes from our Plan Renove, i.e. the used product we collected.

We are also working on the 100% recycled version of other products, such as the iconic Selva chair.

**FINAL PRODUCT MADE
FROM RECYCLED MATERIAL**

Balliu Export remains committed to **protecting the environment** and promoting **sustainable practices** throughout our operations.

Our initiatives to increase the use of sustainable materials and encourage recycling demonstrate our **commitment to environmental** responsibility.

We will continue to look for new ways to improve our environmental performance and work in partnership with our customers and stakeholders **to build a more sustainable future.**

Always sunny
